

Neuroinclusive Learning Environments

Neurodiversity training for educators

Amaze's Creating Inclusive Learning Environments workshop builds educators' knowledge and confidence to support neurodivergent learners. This practical session explores how education settings can create barriers to learning and provides simple, sustainable strategies to create learning spaces where every student can thrive.

What this inclusion education training covers

Participants develop an understanding of Autistic and neurodivergent experiences in post-secondary education, learn to recognise barriers to participation, and build strategies that promote inclusion, accessibility and learner wellbeing.

What you'll learn

You'll learn how to:

- build a foundational understanding of autism and neurodiversity in post-secondary education
- learn what makes a learning environment inclusive for Autistic and neurodivergent students
- explore practical strategies across sensory processing, communication, information processing, and executive function
- understand how to balance different needs in group settings
- learn to identify and respond to student needs, whether formally recognised or not
- apply approaches that support educator wellbeing and enable more inclusive, sustainable teaching practice.

Who should attend

- TAFE and VCE teachers and educators
- adult education and learning and development professionals
- education leaders, mentors and support staff who need practical tools to build neuroinclusion in post-secondary education and education support.
